

**ASME AG-1-2019**  
**(Revision of ASME AG-1-2017)**

# **Code on Nuclear Air and Gas Treatment**

---

**AN AMERICAN NATIONAL STANDARD**

**The American Society of  
Mechanical Engineers**

**ASME AG-1-2019**  
(Revision of ASME AG-1-2017)

# **Code on Nuclear Air and Gas Treatment**

---

**AN AMERICAN NATIONAL STANDARD**

**The American Society of  
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: January 17, 2020

The next edition of this Code is scheduled for publication in 2021.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Periodically certain actions of the ASME Committee on Nuclear Air and Gas Treatment may be published as Cases. Cases and interpretations are published on the ASME website under the Committee Pages at <http://cstools.asme.org/> as they are issued.

Errata to codes and standards may be posted on the ASME website under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Committee Pages can be found at <http://cstools.asme.org/>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting "Errata" in the "Publication Information" section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,  
in an electronic retrieval system or otherwise,  
without the prior written permission of the publisher.

## **FOREWORD**

In 1971, the ANSI N45.8 Committee was organized to develop standards for high reliability air cleaning equipment for nuclear facilities and corresponding tests to confirm performance of the equipment. Two standards, ASME N509 and ASME N510, were published in 1975 and 1976.

In 1976, under the accredited organization rules, the Committee was reorganized as the ASME Committee on Nuclear Air and Gas Treatment. The scope of responsibility increased to include the development of codes and standards for design, fabrication, inspection, and testing of air cleaning and conditioning components and appurtenances used in safety-related systems in nuclear facilities. ASME AG-1, approved by the American National Standards Institute (ANSI) on April 30, 1985 and issued on February 28, 1986, was the new Code resulting from the increased scope. The first revised edition was approved by ANSI on May 22, 2017.

This Code contains mandatory requirements, specific prohibitions, and nonmandatory guidance for construction activities. Construction, as used in this Foreword, is an all-inclusive term relating to material, design, fabrication, inspection, testing, and certification. The Code does not address all aspects of these activities and those not specifically addressed may be considered. The Code is neither a handbook nor a replacement for education, experience, and the use of engineering judgment. The phrase "engineering judgment" refers to technical judgments made by knowledgeable designers experienced in the application of the Code. Engineering judgments must be consistent with Code philosophy and such judgments shall never be used to overrule mandatory requirements or specific prohibitions of the Code. The user is cautioned to carefully review these Code requirements for suitability to specific applications other than nuclear power and nuclear fuel cycle facilities.

The Code requirements established by the Committee shall not be interpreted as approving, recommending, or endorsing any proprietary design.

The Committee on Nuclear Air and Gas Treatment meets regularly to consider revisions of the Code requirements, new Code requirements as dictated by technological development, Code Cases, and requests for interpretations. Only the Committee on Nuclear Air and Gas Treatment has the authority to provide official interpretations of this Code. Requests for revisions, new Code requirements, Code Cases, or interpretations shall be addressed to the Secretary in writing and shall give full particulars in order to receive consideration and action. (See the [Correspondence With the Committee](#) page.)

This edition of ASME AG-1 was approved by ANSI on August 8, 2019, and issued on January 17, 2020. The requirements of this Standard take effect upon its issue date.

# ASME COMMITTEE ON NUCLEAR AIR AND GAS TREATMENT

(The following is the roster of the Committee at the time of approval of this Code.)

## STANDARDS COMMITTEE

|   | <b>N. S. Zaremba</b> , Newport News Shipbuilding             |

## HONORARY MEMBERS

- |  |   |
|--|---|
| <b>J. R. Edwards</b> , Consultant  | <b>J. L. Kovach</b> , NUCON International, Inc. |
| <b>M. W. First</b> , Harvard School of Public Health Air Cleaning Laboratory | <b>W. H. Miller, Jr.</b> , Consultant           |
| <b>D. J. Gladden</b> , Consultant  | <b>S. C. Ornberg</b> , Consultant               |
| <b>C. Golden</b> , Whirlpool Corp.   | <b>R. Porco</b> , RDP Consulting Services       |
| <b>L. J. Klaes</b> , Consultant  | <b>R. R. Weidler</b> , Consultant               |

## SUBCOMMITTEE ON ADSORPTION

**E. M. Banks**, *Chair*, NUCON International, Inc.  
**A. Soma**, *Vice Chair*, Camfil USA, Inc.  
**R. K. Aggarwal**, Sargent & Lundy, LLC  
**R. R. Bellamy**, Camfil USA, Inc.  
**R. Blose**, SSM Industries, Inc.  
**N. J. Cockin**, Cavendish Nuclear  
**S. M. Cox**, NCS Corp.  
**M. A. Doersam**, Ellis & Watts Global Industries, Inc.  
**C. E. Graves**, NUCON International, Inc.

**R. T. Jubin**, Oak Ridge National Laboratory  
**L. J. Rudenas**, Australian Nuclear Science and Technology Organisation  
**C. B. Summers**, NUCON International, Inc.  
**T. Arakelian**, *Contributing Member*, Jet Propulsion Laboratory  
**D. Gibbs**, *Contributing Member*, Camfil USA, Inc.  
**B. Valentin**, *Contributing Member*, SGT, Inc./NASA Goddard Space Flight Center

## SUBCOMMITTEE ON COMMON EQUIPMENT

**M. A. Doersam**, *Chair*, Ellis & Watts Global Industries, Inc.  
**L. Krooswyk**, *Vice Chair*, Burns & McDonnell  
**J. M. Apablaza-Lorca**, Washington River Protection Solutions  
**T. B. Axley, Jr.**, North Wind Group  
**R. Flye**, Consultant  
**D. Gibbs**, Camfil USA, Inc.  
**R. Giberson**, Clayton Associates, Inc.  
**N. Handschke**, Camfil USA, Inc.  
**Z. Hostetler**, SSM Industries  
**S. Khabir**, Washington River Protection Solutions/Hanford  
**D. S. Maletich**, The New York Blower Co.

**C. Massar**, Ruskin Co.  
**J. B. Roberts**, National Security Technologies, LLC  
**J. C. Royer**, Sargent & Lundy, LLC  
**A. Soma**, Camfil USA, Inc.  
**M. T. Sorna**, Puget Sound Naval Shipyard  
**T. Wander**, AAF International  
**W. H. Lampkin**, *Contributing Member*, Greenheck Fan Corp.  
**D. Schoepflin**, *Contributing Member*, Pacific Northwest National Laboratory  
**G. D. Singleton**, *Contributing Member*, AAF International

## SUBCOMMITTEE ON FILTRATION

**H. A. Mearns**, *Chair*, U.S. Army Combat Capabilities Development Command Chemical Biological Center  
**A. Stillo**, *Vice Chair*, Camfil USA, Inc.  
**D. J. Adamson**, Savannah River National Laboratory  
**W. Bergman**, Aerosol Science  
**H. Cho**, Mississippi State University  
**S. Dinakaran**, AAF Flanders  
**D. M. Dykes**, Consultant  
**G. Garcia**, Bechtel National, Inc.  
**M. R. Hahn**, U.S. Department of Energy  
**N. Handschke**, Camfil USA, Inc.  
**C. A. Hart**, Air Techniques International Test Laboratory  
**S. Khabir**, Washington River Protection Solutions/Hanford  
**J. Levinson**, BWX Technologies, Inc.  
**L. E. Major**, Lydall  
**M. A. Mitchell**, Lawrence Livermore National Laboratory  
**G. W. Moore**, Camfil USA, Inc.

**D. P. Nguyen**, U.S. Army Edgewood Chemical Biological Center  
**G. G. Pyle**, Knolls Atomic Power Laboratory  
**C. I. Ricketts**, Engineering Services Company, LLC  
**K. L. Rubow**, Mott Corp.  
**L. J. Rudenas**, ANSTO  
**S. Salisbury**, Los Alamos National Laboratory  
**M. T. Sorna**, Puget Sound Naval Shipyard  
**J. A. Stormo**, Mississippi State University — Institute for Clean Energy Technology  
**C. A. Waggoner**, Mississippi State University — Institute for Clean Energy Technology  
**N. S. Zaremba**, Newport News Shipbuilding  
**J. S. MacMurray**, *Contributing Member*, Savannah River National Laboratory  
**D. Schoepflin**, *Contributing Member*, Pacific Northwest National Laboratory  
**L. D. Weber**, *Contributing Member*, Stony Brook University

## PROJECT TEAM ON SECTION FA: MOISTURE SEPARATORS

**M. A. Doersam**, *Chair*, Ellis & Watts Global Industries, Inc.  
**G. Dalton**, Bechtel National, Inc.  
**S. Khabir**, Washington River Protection Solutions/Hanford

**H. A. Mearns**, U.S. Army Combat Capabilities Development Command Chemical Biological Center  
**C. I. Ricketts**, Engineering Services Company, LLC

## PROJECT TEAM ON SECTION FC: HEPA FILTERS

- A. Stillo**, Chair, Camfil USA, Inc.  
**H. Mearns**, Vice Chair, U.S. Army Combat Capabilities Development Command Chemical Biological Center  
**D. J. Adamson**, Savannah River National Laboratory  
**B. M. Baker**, SciTech Services, Inc.  
**S. Barnette**, U.S. Department of Energy  
**H. Cho**, Mississippi State University  
**S. Dinakaran**, AAF Flanders  
**D. M. Dykes**, Consultant  
**C. Fosseen**, Newport News Shipbuilding  
**N. Galante**, AAF International  
**G. Garcia**, Bechtel National, Inc.  
**M. R. Hahn**, U.S. Department of Energy  
**N. Handschke**, Camfil USA, Inc.  
**C. A. Hart**, Air Techniques International Laboratory  
**S. Khabir**, Washington River Protection Solutions/Hanford  
**J. R. Kriskovich**, Kurion, Inc.  
**J. Levinson**, BWX Technologies, Inc.  
**L. E. Major**, Lydall  
**E. McCormick**, Washington Department of Health, Radioactive Air Emissions  
**J. C. Medley**, Nevada National Security Site  
**G. W. Moore**, Camfil USA, Inc.  
**J. Nagengast**, Lawrence Livermore National Laboratory  
**D. P. Nguyen**, U.S. Army Edgewood Chemical Biological Center  
**G. G. Pyle**, Knolls Atomic Power Laboratory  
**C. I. Ricketts**, Engineering Services Company, LLC  
**S. Salisbury**, Los Alamos National Laboratory  
**D. Schoepflin**, Pacific Northwest National Laboratory  
**M. T. Sorna**, Puget Sound Naval Shipyard  
**J. A. Stormo**, Mississippi State University — Institute for Clean Energy Technology  
**C. A. Waggoner**, Mississippi State University — Institute for Clean Energy Technology  
**T. Wander**, AAF International  
**J. Webb**, Y-12 National Security Complex  
**N. S. Zaremba**, Newport News Shipbuilding  
**J. S. MacMurray**, Contributing Member, Savannah River National Laboratory

## PROJECT TEAM ON SECTION FI: METAL MEDIUM FILTERS

- H. Cho**, Chair, Mississippi State University  
**D. J. Adamson**, Savannah River National Laboratory  
**M. Bauer**, Westinghouse Electric Germany GmbH  
**W. Bergman**, Aerosol Science  
**C. B. Chadwick**, Microfiltrex Ltd  
**E. Duvekot**, Porvair Filtration Group, Inc.  
**C. A. Hart**, Air Techniques International Test Laboratory  
**D. Klein**, AREVA NP, Inc.  
**K. G. Nelson**, Porvair Filtration Group, Inc.  
**D. P. Nguyen**, U.S. Army Edgewood Chemical Biological Center  
**K. L. Rubow**, Mott Corp.  
**S. Salisbury**, Los Alamos National Laboratory  
**J. R. Shultz**, U.S. Department of Energy  
**A. Stillo**, Camfil USA, Inc.  
**J. A. Stormo**, Mississippi State University – Institute for Clean Energy Technology  
**C. A. Waggoner**, Mississippi State University – Institute for Clean Energy Technology

## PROJECT TEAM ON SECTION FK: SPECIAL HEPA FILTERS

- G. W. Moore**, Chair, Camfil USA, Inc.  
**N. S. Zaremba**, Vice Chair, Newport News Shipbuilding  
**B. M. Baker**, SciTech Services, Inc.  
**S. Barnette**, U.S. Department of Energy  
**P. Basile**, Clayton Associates, Inc.  
**H. Cho**, Mississippi State University  
**G. Dalton**, Bechtel National, Inc.  
**S. Dinakaran**, AAF Flanders  
**E. Duvekot**, Porvair Filtration Group, Inc.  
**D. M. Dykes**, Consultant  
**C. Fosseen**, Newport News Shipbuilding  
**G. Garcia**, Bechtel National, Inc.  
**R. Giberson**, Clayton Associates, Inc.  
**M. R. Hahn**, U.S. Department of Energy  
**C. A. Hart**, Air Techniques International Test Laboratory  
**Z. Hostetler**, SSM Industries  
**S. Khabir**, Washington River Protection Solutions/Hanford  
**J. R. Kriskovich**, Kurion, Inc.  
**J. Levinson**, BWX Technologies, Inc.  
**L. E. Major**, Lydall  
**E. McCormick**, Washington State Department of Health, Radioactive Air Emissions  
**H. A. Mearns**, U.S. Army Combat Capabilities Development Command Chemical Biological Center  
**K. G. Nelson**, Porvair Filtration Group, Inc.  
**D. P. Nguyen**, U.S. Army Edgewood Chemical Biological Center  
**G. G. Pyle**, Knolls Atomic Power Laboratory  
**C. I. Ricketts**, Engineering Services Company, LLC  
**S. Salisbury**, Los Alamos National Laboratory  
**J. R. Shultz**, U.S. Department of Energy  
**M. T. Sorna**, Puget Sound Naval Shipyard  
**A. Stillo**, Camfil USA, Inc.  
**J. A. Stormo**, Mississippi State University — Institute for Clean Energy Technology  
**B. Swinnerton**, Sellafield Ltd  
**C. A. Waggoner**, Mississippi State University — Institute for Clean Energy Technology  
**J. Webb**, Y-12 National Security Complex  
**G. L. Laws**, Contributing Member, Washington State Department of Health, Office of Radiation Protection  
**J. S. MacMurray**, Contributing Member, Savannah River National Laboratory

## PROJECT TEAM ON SECTION FM: HIGH STRENGTH HEPA FILTERS

- C. I. Ricketts**, *Chair*, Engineering Services Company, LLC  
**B. M. Baker**, SciTech Services, Inc.  
**S. Barnette**, U.S. Department of Energy  
**W. Bergman**, Aerosol Science  
**G. Dalton**, Bechtel National, Inc.  
**S. Dinakaran**, AAF Flanders  
**E. Duvekot**, Porvair Filtration Group, Inc.  
**M. R. Hahn**, U.S. Department of Energy  
**J. R. Kriskovich**, Kurion, Inc.  
**J. S. MacMurray**, Savannah River National Laboratory
- L. E. Major**, Lydall  
**D. P. Nguyen**, U.S. Army Edgewood Chemical Biological Center  
**G. G. Pyle**, Knolls Atomic Power Laboratory  
**J. R. Schultz**, U.S. Department of Energy  
**A. Stillo**, Camfil USA, Inc.  
**J. A. Stormo**, Mississippi State University — Institute for Clean Energy Technology  
**N. S. Zaremba**, Newport News Shipbuilding  
**G. L. Laws**, *Contributing Member*, Washington State Department of Health, Office of Radiation Protection

## SUBCOMMITTEE ON GAS PROCESS TREATMENT EQUIPMENT

- R. T. Jubin**, *Chair*, Oak Ridge National Laboratory  
**M. R. Hargan**, *Vice Chair*, Hargan Engineering  
**T. B. Axley, Jr.**, North Wind Group  
**M. Bauer**, Westinghouse Electric Germany GmbH  
**J. O. Bettle**, U.S. Nuclear Regulatory Commission  
**S. Brink**, ANSTO  
**M. J. Fox**, ECU Corp.  
**D. Ghosh**, Southern Nuclear
- D. Klein**, AREVA NP, Inc.  
**J. R. Kriskovich**, Kurion, Inc.  
**D. Ryland**, Canadian Nuclear Laboratories  
**M. Sulva**, APTIM — Kings Bay Support Services, LLC  
**C. Wojcik**, PMT Nuclear  
**C. A. Curtis**, *Contributing Member*, West Valley Nuclear  
**W. P. Drosjack**, *Contributing Member*, Retired  
**I. Kutuzov**, *Contributing Member*, Alfa Laval, Inc. (Canada)

## PROJECT TEAM ON SECTION GA: HEAT EXCHANGERS

- M. J. Fox**, *Chair*, ECU Corp.  
**M. R. Hargan**, *Vice Chair*, Hargan Engineering  
**D. Ghosh**, *Contributing Member*, Southern Nuclear
- J. R. Kriskovich**, *Contributing Member*, Kurion, Inc.  
**I. Kutuzov**, *Contributing Member*, Alfa Laval, Inc. (Canada)  
**C. Wojcik**, *Contributing Member*, PMT Nuclear

## PROJECT TEAM ON SECTION GB: NOBLE GAS HOLDUP EQUIPMENT

- M. Sulva**, *Chair*, APTIM — Kings Bay Support Services, LLC  
**T. B. Axley, Jr.**, North Wind Group  
**S. Brink**, ANSTO  
**D. M. Dykes**, Consultant  
**D. Ghosh**, Southern Nuclear  
**M. R. Hargan**, Hargan Engineering
- R. T. Jubin**, Oak Ridge National Laboratory  
**J. B. Roberts**, National Security Technologies, LLC  
**D. Ryland**, Canadian Nuclear Laboratories  
**N. Soelberg**, Idaho National laboratory  
**A. Soma**, Camfil USA, Inc.

## PROJECT TEAM ON SECTION GC: MULTISTAGE BLOWERS

- M. J. Fox**, *Chair*, ECU Corp.  
**M. R. Hargan**, *Vice Chair*, Hargan Engineering  
**T. B. Axley, Jr.**, North Wind Group
- A. M. Kouvolos**, Consultant  
**W. P. Drosjack**, *Contributing Member*, Retired

## PROJECT TEAM ON SECTION GE: HYDROGEN RECOMBINERS

- M. Sulva**, *Chair*, APTIM — Kings Bay Support Services, LLC  
**M. Bauer**, *Vice Chair*, Westinghouse Electric Germany GmbH  
**T. B. Axley, Jr.**, North Wind Group  
**M. R. Hargan**, Hargan Engineering  
**R. T. Jubin**, Oak Ridge National Laboratory  
**D. Klein**, AREVA NP, Inc.

**B. C. Elliott**, Super Radiator Coils  
**N. Galante**, AAF International  
**D. Ghosh**, Southern Nuclear

**D. Gibbs**, Camfil USA, Inc.  
**L. Krooswyk**, Burns & McDonnell  
**G. Roca**, Westinghouse Electric Spain  
**A. Soma**, Camfil USA, Inc.  
**M. Sulva**, APTIM — Kings Bay Support Services, LLC

## SUBCOMMITTEE ON TECHNOLOGY

**A. Soma**, *Chair*, Camfil USA, Inc.  
**N. Zaremba**, *Vice Chair*, Newport News Shipbuilding  
**R. K. Aggarwal**, Sargent & Lundy, LLC  
**T. B. Axley, Jr.**, North Wind Group  
**E. M. Banks**, NUCON International, Inc.  
**M. A. Doersam**, Ellis & Watts Global Industries, Inc.  
**C. Fosseen**, Newport News Shipbuilding  
**D. Ghosh**, Southern Nuclear  
**C. E. Graves**, NUCON International, Inc.  
**J. R. Kriskovich**, Kurion, Inc.  
**J. C. Medley**, Nevada National Security Site  
**D. P. Nguyen**, U.S. Army Edgewood Chemical Biological Center

**J. C. Royer**, Sargent & Lundy, LLC  
**R. R. Sommer**, NUCON International, Inc.  
**M. T. Sorna**, Puget Sound Naval Shipyard  
**C. B. Summers**, NUCON International, Inc.  
**T. J. Vogan**, Sargent & Lundy, LLC  
**C. A. Waggoner**, Mississippi State University — Institute for Clean Energy Technology  
**T. Wander**, AAF International  
**J. Webb**, Y-12 National Security Complex  
**G. L. Laws**, *Contributing Member*, Washington State Department of Health, Office of Radiation Protection

## SUBCOMMITTEE ON TESTING AND INSPECTION

**N. S. Zaremba**, *Chair*, Newport News Shipbuilding  
**S. Khabir**, *Vice Chair*, Washington River Protection Solutions/  
Hanford  
**E. M. Banks**, NUCON International, Inc.  
**S. Barnette**, U.S. Department of Energy  
**S. M. Cox**, NCS Corp.  
**K. S. Eng**, U.S. Army Research, Development and Engineering  
Command  
**R. Flye**, Consultant  
**C. Fosseen**, Newport News Shipbuilding  
**R. Giberson**, Clayton Associates, Inc.  
**M. R. Hahn**, U.S. Department of Energy  
**G. L. Laws**, Washington State Department of Health, Office of Radia-  
tion Protection  
**J. Levinson**, BWX Technologies, Inc.  
**J. S. MacMurray**, Savannah River National Laboratory

**E. McCormick**, Washington State Department of Health, Radioactive  
Air Emissions  
**J. C. Medley**, Nevada National Security Site  
**B. Prinkey**, NCS Corp.  
**G. G. Pyle**, Knolls Atomic Power Laboratory  
**A. Salvatore**, U.S. Army Research, Development and Engineering  
Command, Chemical Biological Center  
**D. Schoepflin**, Pacific Northwest National Laboratory  
**R. R. Sommer**, NUCON International, Inc.  
**M. T. Sorna**, Puget Sound Naval Shipyard  
**T. Wander**, AAF International  
**J. Webb**, Y-12 National Security Complex  
**D. P. Nguyen**, *Contributing Member*, U.S. Army Edgewood Chemical  
Biological Center  
**G. D. Singleton**, *Contributing Member*, AF International

## SUBCOMMITTEE ON VENTILATION AIR CONDITIONING EQUIPMENT

**D. Ghosh**, *Chair*, Southern Nuclear  
**M. J. Fox**, *Vice Chair*, ECU Corp.  
**T. B. Axley, Jr.**, North Wind Group  
**B. C. Elliott**, Super Radiator Coils  
**S. J. Fackleman**, Ellis & Watts Global Industries  
**M. R. Hargan**, Hargan Engineering  
**G. Roca**, Westinghouse Electric Spain

**T. J. Schaefer**, Sargent & Lundy, LLC  
**C. Wojcik**, PMT Nuclear  
**W. P. Drosjack**, *Contributing Member*, Retired  
**R. Kim**, *Contributing Member*, Finetec Century America, Inc.  
**R. N. Knoche**, *Contributing Member*, Consultant  
**I. Kutuzov**, *Contributing Member*, Alfa Laval, Inc. (Canada)

# CORRESPONDENCE WITH THE COMMITTEE ON NUCLEAR AIR AND GAS TREATMENT

**General.** ASME Standards are developed and maintained with the intent to represent the consensus of concerned interests. As such, users of this Code may interact with the Committee by requesting interpretations, proposing revisions or a case, and attending Committee meetings. Correspondence should be addressed to:

Secretary, Standards Committee on Nuclear Air and Gas Treatment  
The American Society of Mechanical Engineers  
Two Park Avenue  
New York, NY 10016-5990  
<http://go.asme.org/Inquiry>

**Proposing Revisions.** Revisions are made periodically to the Code to incorporate changes that appear necessary or desirable, as demonstrated by the experience gained from the application of the Code. Approved revisions will be published periodically.

The Committee welcomes proposals for revisions to this Code. Such proposals should be as specific as possible, citing the paragraph number(s), the proposed wording, and a detailed description of the reasons for the proposal, including any pertinent documentation.

**Proposing a Case.** Cases may be issued to provide alternative rules when justified, to permit early implementation of an approved revision when the need is urgent, or to provide rules not covered by existing provisions. Cases are effective immediately upon ASME approval and shall be posted on the ASME Committee web page.

Requests for Cases shall provide a Statement of Need and Background Information. The request should identify the Code and the paragraph, figure, or table number(s), and be written as a Question and Reply in the same format as existing Cases. Requests for Cases should also indicate the applicable edition(s) of the Code to which the proposed Case applies.

**Interpretations.** Upon request, the Standards Committee on Nuclear Air and Gas Treatment (CONAGT) will render an interpretation of any requirement of the Code. Interpretations can only be rendered in response to a written request sent to the Secretary of CONAGT.

Requests for interpretation should preferably be submitted through the online Interpretation Submittal Form. The form is accessible at <http://go.asme.org/InterpretationRequest>. Upon submittal of the form, the Inquirer will receive an automatic e-mail confirming receipt.

If the Inquirer is unable to use the online form, he/she may mail the request to the Secretary of CONAGT at the above address. The request for an interpretation should be clear and unambiguous. It is further recommended that the Inquirer submit his/her request in the following format:

|                         |   |
|-------------------------|---|
| Subject:                | Cite the applicable paragraph number(s) and the topic of the inquiry in one or two words.   |
| Edition:                | Cite the applicable edition of the Code for which the interpretation is being requested.  |
| Question:               | Phrase the question as a request for an interpretation of a specific requirement suitable for general understanding and use, not as a request for an approval of a proprietary design or situation. Please provide a condensed and precise question, composed in such a way that a "yes" or "no" reply is acceptable. |
| Proposed Reply(ies):    | Provide a proposed reply(ies) in the form of "Yes" or "No," with explanation as needed. If entering replies to more than one question, please number the questions and replies.   |
| Background Information: | Provide the Committee with any background information that will assist the Committee in understanding the inquiry. The Inquirer may also include any plans or drawings that are necessary to explain the question; however, they should not contain proprietary names or information.                                 |

Requests that are not in the format described above may be rewritten in the appropriate format by the Committee prior to being answered, which may inadvertently change the intent of the original request.

Moreover, ASME does not act as a consultant for specific engineering problems or for the general application or understanding of the Code requirements. If, based on the inquiry information submitted, it is the opinion of the Committee that the Inquirer should seek assistance, the inquiry will be returned with the recommendation that such assistance be obtained.

ASME procedures provide for reconsideration of any interpretation when or if additional information that might affect an interpretation is available. Further, persons aggrieved by an interpretation may appeal to the cognizant ASME Committee or Subcommittee. ASME does not "approve," "certify," "rate," or "endorse" any item, construction, proprietary device, or activity.

**Attending Committee Meetings.** CONAGT regularly holds meetings and/or telephone conferences that are open to the public. Persons wishing to attend any meeting and/or telephone conference should contact the Secretary of CONAGT.

# ORGANIZATION OF ASME AG-1

(19)

## 1 GENERAL

The ASME Code on Nuclear Air and Gas Treatment consists of Divisions I through IV. All divisions are broken down into sections designated by two capital letters. Each division is made up as follows:

### Division I: General Requirements

Section AA: Common Articles

Section AB: System Design Guide

### Division II: Ventilation Air Cleaning and Ventilation Air Conditioning

Section BA: Fans and Blowers

Section DA: Dampers and Louvers

Section SA: Ductwork

Section HA: Housings

Section RA: Refrigeration Equipment

Section CA: Conditioning Equipment

Section FA: Moisture Separators

Section FB: Medium Efficiency Filters

Section FC: HEPA Filters

Section FD: Type II Adsorber Cells

Section FE: Type III Adsorbers

Section FF: Adsorbent Media

Section FG: Mounting Frames for Air-Cleaning Equipment

Section FH: Other Adsorbers

Section FI: Metal Media Filters

Section FJ: Low Efficiency Filters

Section FK: Special HEPA Filters

Section FL: Deep Bed Sand Filters

Section FM: High-Strength HEPA Filters

Section FN: Filter Media: High Efficiency

Section IA: Instrumentation and Controls

### Division III: Process Gas Treatment

Section GA: Heat Exchangers

Section GB: Noble Gas Hold-Up Equipment

Section GC: Gas Compressors and Exhausters

Section GE: Hydrogen Recombiners and Igniters

Section GF: Gas Sampling

Section GG: Scrubbers

Section GH: Cyclones

Section GJ: Filters

Section GK: Mist Eliminators

Section GM: Noble Gas Hold-Up Media

### Division IV: Testing Procedures

Section TA: Field Testing of Air Treatment Systems

Section TB: Field Testing of Gas-Processing Systems

## 2 SECTIONS

Sections are divided into articles, subarticles, paragraphs, and, where necessary, subparagraphs and subsubparagraphs.

## 3 ARTICLES

Articles are designated by the application letters indicated above for the sections, followed by Arabic numbers in units of 1000, such as BA-1000 or RA-2000. Where possible, articles dealing with the same topics are given the same number in each section in accordance with the following:

| Article Number | Title  |
|----------------|--|
| 1000           | Introduction   |
| 2000           | Referenced Documents   |
| 3000           | Materials  |
| 4000           | Structural Design  |
| 5000           | Inspection and Testing   |
| 6000           | Fabrication, Joining, Welding, Brazing, Protective Coating, and Installation |
| 7000           | Packaging, Shipping, Receiving, Storage, and Handling                        |
| 8000           | Quality Assurance  |
| 9000           | Nameplates and Stamping  |

The numbering of articles and the material contained in the articles may not, however, be consecutive. Because the complete outline may cover phases not applicable to a particular section or article, the rules have been prepared with some gaps in the numbering.

## 4 SUBARTICLES

Subarticles are numbered in units of 100, such as BA-1100 or RA-1200.

## **5 SUBSUBARTICLES**

Subsubarticles are numbered in units of 10, such as BA-2130, and generally have no text. When a number such as BA-1110 is followed by text, it is considered a paragraph.

## **6 PARAGRAPHS**

Paragraphs are numbered in units of 1, such as BA-2131 or RA-2132.

## **7 SUBPARAGRAPHS**

Subparagraphs, when they are major subdivisions of a paragraph, are designated by adding a decimal followed by one or more digits to the paragraph number, such as BA-1111.1 or RA-1111.2. When they are minor subdivisions of a paragraph, subparagraphs may be designated by lowercase letters in parentheses, such as BA-1111(a) or RA-1111(b).

## **8 SUBSUBPARAGRAPHS**

Subsubparagraphs are designated by adding lowercase letters in parentheses to major subparagraph numbers, such as BA-1111.1(a) or RA-1111.2(b). When further subdivisions of minor subparagraphs are necessary, subsubparagraphs are designated by adding Arabic numerals in parentheses to the subparagraph designation, such as BA-1111(a)(1) or RA-1111(a)(2).

## **9 APPENDICES**

Appendices pertaining to each section appear at the end of each section and are designated with the section prefix. Nonmandatory appendices are designated by letters of the alphabet, and mandatory appendices are designated by Roman numerals. Metric appendices carry the same designators as customary appendices, with the prefix "M."

# ASME AG-1-2019

## SUMMARY OF CHANGES

Following approval by the ASME AG Committee and ASME, and after public review, ASME AG-1-2019 was approved by the American National Standards Institute on August 8, 2019.

ASME AG-1-2019 includes the following changes identified by a margin note, (19).

| <i>Page</i> | <i>Location</i>           | <i>Change</i>   |
|-------------|---------------------------|---|
| xlv         | Organization of ASME AG-1 | Paragraph 1 revised   |
| 1           | AA-1400                   | Definitions of <i>manufacturer's qualified standard or material</i> and <i>safe shutdown earthquake</i> editorially revised   |
| 27          | AA-6324.3                 | Paragraph editorially revised   |
| 27          | AA-6324.4                 | Paragraph editorially revised   |
| 30          | AA-6511                   | First sentence editorially revised  |
| 39          | Table AA-10540-1          | Table editorially revised   |
| 41          | Article AA-A-3000         | Editorially revised   |
| 50          | AA-A-7311                 | Editorially revised   |
| 60          | Article AA-C-2000         | Editorially revised   |
| 62          | Section AB                | Added   |
| 75          | BA-1400                   | Definitions of <i>axial fans</i> , <i>fan arrangement number</i> , <i>inlet/outlet cones</i> , and <i>stall/surge limit</i> editorially revised   |
| 78          | BA-4121                   | Editorially revised   |
| 86          | BA-A-1400                 | Editorially revised   |
| 91          | DA-1480                   | Definition of <i>fire damper construction</i> editorially revised   |
| 99          | Article DA-9000           | Title editorially revised   |
| 99          | DA-9100                   | Title editorially revised   |
| 102         | Figure DA-II-1000-2       | Title added   |
| 102         | Figure DA-II-1000-3       | Title added   |
| 103         | Figure DA-II-1000-4       | Title added   |
| 103         | Figure DA-II-1000-5       | Title added   |
| 104         | Figures DA-II-1000-6      | Title added   |
| 108         | Table DA-A-1000-1         | For DA-9000, Item editorially revised   |
| 110         | SA-1400                   | (1) Definitions of <i>accessories</i> and <i>grille</i> editorially revised<br>(2) <i>damper</i> , <i>splitter</i> editorially revised to <i>splitter damper</i> and its definition editorially revised |
| 115         | SA-4410                   | In subpara. (b), second sentence editorially revised  |
| 115         | SA-4430                   | First sentence editorially revised  |
| 115         | SA-4451                   | Subparagraphs (c)(1) through (c)(3) editorially revised   |
| 116         | SA-4455                   | Added   |
| 116         | SA-4533                   | Editorially revised   |
| 119         | SA-6122                   | Editorially revised   |

| <i>Page</i> | <i>Location</i>   | <i>Change</i>  |
|-------------|-------------------|--|
| 122         | Table SA-6400-2   | In first row, entry in first column corrected by errata to read "Less than 12"   |
| 123         | Table SA-6400-3   | Definition of <i>t</i> revised   |
| 126         | Article SA-B-1000 | Title added  |
| 126         | SA-B-1100         | First sentence editorially revised   |

## General Requirements

---

### SECTION AA

#### COMMON ARTICLES

##### **ARTICLE AA-1000**

###### **INTRODUCTION**

###### **AA-1100 SCOPE**

This Code provides requirements for the performance, design, fabrication, installation, inspection, acceptance testing, and quality assurance of equipment used in air and gas treatment systems in nuclear facilities.

###### **AA-1200 PURPOSE**

The purpose of this Code is to ensure that equipment used in nuclear facilities for air and gas treatment systems is acceptable in all aspects of design and operation.

###### **AA-1300 APPLICABILITY**

This Code applies only to individual components in a system. This Code does not cover any functional system design requirements or sizing of complete systems, or any operating characteristics of these systems. The responsibility for meeting each requirement of this Code shall be assigned to the Owner or assigned designee.

The requirements of ASME AG-1 for air and gas treatment components may be used for engineered safety features systems and normal systems in nuclear power generation facilities, and for air cleaning systems in other nuclear facilities. The design and procurement specifications shall delineate the design, qualification, and quality assurance requirements appropriate for the application.

###### **(19) AA-1400 DEFINITIONS AND TERMS**

Each Code section shall delineate the definitions and terms unique to that section. Definitions that have common application are listed in this Article.

*acceptance test:* a test made upon completion of fabrication, installation, repair, or modification of a unit, component, or part to verify to the user or Owner that the item meets specified requirements.

*active component:* any component that must perform a mechanical motion or change of state during the course of accomplishing a nuclear safety-related function.

*air density:* 0.075 lb/ft<sup>3</sup> (1.201 kg/m<sup>3</sup>) for standard air. This corresponds to air at a pressure of 29.92 in. Hg (760 mm Hg) at a temperature of 69.8°F (21°C) with a specific volume of 13.33 ft<sup>3</sup>/lb (0.832 m<sup>3</sup>/kg).

*airflow (cfm, acfm, scfm, acms, scms):* expressed in terms of cubic feet of air per minute (cfm). Actual cfm (acf m) is a cubic foot of air with a density at actual existing conditions. Standard cfm (scfm) is a cubic foot of air with a standard density. The terms "acms" and "scms" correspondingly apply to cubic meters per second under actual and standard conditions.

*allowable deflection (d<sub>all</sub>):* the deflection resulting from each of the component loading conditions defined in [AA-4212](#).

*allowable stress value (S):* the maximum stress limit to be used in the design.

*assembly:* two or more devices sharing a common mounting or supporting structure.

*broadband response spectrum:* a response spectrum that describes the motion indicating that multiple frequency excitation predominates.

*certificate of compliance:* a written statement attesting that the materials are in accordance with specified requirements.

*certificate of conformance:* a document signed or otherwise authenticated by an authorized individual certifying the degree to which items or services meet specified requirements.

*Certified Material Test Report (CMTR):* a document provided by the Material Manufacturer or Material Supplier and signed by an authorized individual that contains sufficient data and information to verify the physical and chemical properties of the furnished material.
